

Powered Air Purifying Respirators (PAPR) by Dräger - the Dräger X-plore® 8500 and X-plore® 8700

Powered air purifying respirators (PAPR) protect your respiratory system against harmful particles and/or gases and vapours. PAPR offers virtually no breathing resistance and can be used with different breathing filters and headpieces such as:

Short Hoods | Long Hoods | Half or Full Face Masks

SAFE

Self-explanatory operation minimizes user error

The unit recognizes connected headgear and automatically selects the correct minimum flow rate, avoiding leakages caused by insufficient flow rates. Dräger X-plore® 8000 offers a new level of intuitive handling combined with intelligent electronics that provide the high degree of safety.

EASY TO MAINTAIN

Simple Handling & Cleaning

- Efficient cleaning together with secure operation.
- The unit is designed for fast and easy disassembly for cleaning.
- The unit is designed for easy sanitization.

FAST CHARGING

Less idle time & more productive hours

The simple and efficient charging system allows rapid charging.

TWO VARIANTS FOR YOUR SAFETY

The Dräger X-plore® 8000 series offers a new level of breathing protection combined with intelligent electronics that provide the high degree of breathing safety to people. I/P 65 approved Standard Dräger X-plore® 8500 and Explosion-approved (ATEX) Dräger X-plore® 8700.

Dräger X-plore® 8500

The device features heavy duty design with rubber protectors and high ingress protection (IP65) against dust and water jets from any direction.

Dräger X-plore® 8700

In work areas requiring explosion protection, the special Dräger X-plore 8700 model provides optimal support. It is ex-approved and can be used in ex-zones 1, 2, 21 and 22.

Approved and tested as per EN 12941 and NIOSH
