

## Dräger X-plore® 3300/3500

A perfect combination of modern design and light weight offers long lasting protection and comfort under tough conditions.

### **TWIN-FILTER HALF-FACE MASK**

- mask body made from Soft-TPE or DrägerFlex material (silicon free)
- to be used with X-plore Bayonet filters

## COMFORTABLE

### Easy respiration with low resistance

The innovative design of the respiratory protection masks ensures easy, comfortable breathing. A large opening on the exhalation valve keeps resistance low.

## SAFE

### Innovative product features ensure optimal safety

The specially designed, flexible nose bridge ensures an extra secure fit that contours perfectly to the face, even when worn with protective eyewear.

## WELL-FITTING

### Optimal fit for any face

The positioning of the filters on the sides and the flat design of the masks provide maximum field of view and a secure fit, even when worn with a protective visor. Its innovative design makes it easy to don and doff without getting tangled in the wearer's hair. Plus, there are three sizes to choose from (S, M, L) to make sure the masks are always an optimal fit.

### Filter

Dräger X-plore® Bayonet: The innovative Dräger X-plore® Bayonet filter series is designed for a wide range of applications. It combines modern design with low breathing resistance. Because the bayonet filter is positioned on the side of the respirator mask, the wearer has a wide, uninterrupted field of vision.

Available in **NIOSH & EN** approved versions
